Art Unit:1646

DETAILED ACTION

Election/Restriction

1. Applicant's election with traverse of Group I (claims 1-21, 29-31, 34-43 and 47) in Paper No. 7, filed on November 15, 1999 is acknowledged. Upon further consideration the Examiner has decided to re-restrict the claims of Group I as shown below.

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-21, 29-31 and 47, drawn to an isolated polypeptide, a pharmaceutical composition comprising said polypeptide, and a method of treatment using said polypeptide, classified in class 530 subclass 350.
- II. Claims 34-43, drawn to a method of reconditioning a molecule by contacting said molecule with a polypeptide, classified in class 435, sub class 7.2.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (M.P.E.P. § 806.05(h)). In the instant case the polypeptide as claimed can be used diagnostically, or as an antigen for the production of antibodies.

Art Unit:1646

Having shown that these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and recognized divergent subject matter as defined by MPEP § 808.02, the Examiner has prima facie shown a serious burden of search (see MPEP § 803). Therefore, an initial requirement of restriction for examination purposes as indicated is proper.

3. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(h).

4. This application contains sequence disclosures that are encompassed by the definitions for nucleotide and/or amino acid sequences set forth in 37 CFR 1.821(a)(1) and (a)(2). However, this application fails to comply with the requirements of 37 CFR 1.821 through 1.825 for the reason(s) set forth on the attached Notice To Comply With Requirements For Patent Applications Containing Nucleotide Sequence And/Or Amino Acid Sequence Disclosures.

Direct the reply to the undersigned. Applicant is requested to return a copy of the attached Notice to Comply with the reply.
